Technical Expertise

Ruby / JavaScript / Golang / Node.js	OO Programming	RESTful API Design
Rails / AngularJS / ReactJS / Express	Feature & Unit Testing / TDD	SQL / NoSQL Database

Work Experience

Lead Instructor at Anyone Can Learn To Code

New York, NY June 2016 - Current

- Break down complex/abstract programming concepts to ensure student's understanding
- Perceive how others learn and create an atmosphere to foster that learning
- Provide a solid foundation of programming principles for beginners

Software Engineer at Vail Systems

Chicago, IL October 2014 - June 2016

RACC - Routing and Call Control

- Utilize Object Oriented design principles to work with legacy code in creating features
- Reduce technical debt throughout project by refactoring code to meet best practices
- Implement Continuous Integration with Jenkins builds to automate tests and deploy
- Write extensive feature and unit tests to provide confidence in company's highest grossing app and ensure customer satisfaction

Vanguard - Single Sign On for Vail product line

- Incorporated OpenId Connect and OmniAuth for identity protocol
- Wired Swagger documentation to API to give direction to developers on using as a single sign on for their app

Eyrie - In-house app for security training

- Internship project that became the security training for all employees
- Created a way for security admins to write interactive lessons to satisfy auditing requirements
- Built backend to allow admins to track progress of users and create custom reports

Developer at Peer Nation

Chicago, IL May 2015 - May 2016

- Side project, building peer-to-peer networking system for sales professionals
- Built extensive Rails API to work with Angular / JavaScript for frontend
- Created entire social network from scratch, bottom up, front to back
- Beta at peernation.herokuapp.com

Account Manager / Consultant at myCNAjobs

Chicago, IL November 2012 - April 2014

- Created new sales process for startup and implemented with sales team
- Collaborated with product team to create a better user experience, doubling sales
- Closed new accounts to meet monthly goals while consulting with 200+ clients

Education

Brigham Young University *Spring 2012, Provo, UT*
Bachelor of Arts English - Minor in Business

Anyone Can Learn To Code
Summer 2014

Interests

- Reading (Charles Dickens is my favorite) and writing (most any kind of prose)
- Piano - favorite contemporary composers are Yanni and Jon Schmidt
- Volunteer work - particularly at my wife's pediatric cancer foundation
- Avid Premier League fan (Bundesliga as well!)
